

## SMART Meeting Pro™ software

For even more options, choose SMART Meeting Pro Premium software.

In addition to the functionality of SMART Meeting Pro, you can

- Automate data conferencing with the purchase of SMART Bridgit™ conferencing software, so you can share screens with remote participants with a single touch
- Manage multiple displays from the same meeting room computer
- Enjoy text recognition, so you can convert handwritten notes to text objects

Enhance teamwork and boost productivity with SMART Meeting Pro software, our interactive whiteboarding software for business that enables you to digitally capture and share ideas. With SMART Meeting Pro, you can display files on your SMART Board™ interactive whiteboard or display and write notes in digital ink during collaborative work sessions. You can mark up files in standard office applications, write notes over web pages or simply make whiteboard notes – and then save your work for immediate distribution.

### Share ideas more effectively

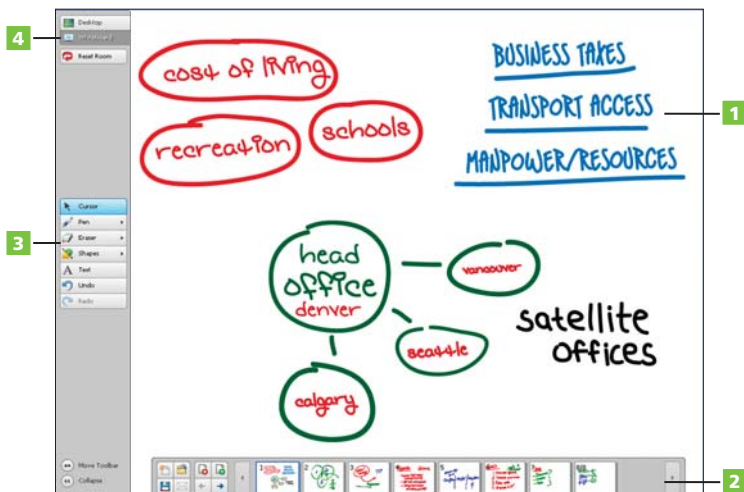

SMART Meeting Pro is designed to enhance the way people share ideas in virtually any business setting. It's the software that drives our collaboration systems, giving you a powerful, engaging way to communicate information, capture feedback and document decisions for easy distribution. Along with touch-enabled whiteboarding features, digital ink capability and options for saving your work, SMART Meeting Pro gives you the ability to work on a large interactive surface with the software you use every day.

### Save and share work the way you want

With SMART Meeting Pro, you have options for capturing your work. You can write whiteboard notes in digital ink, then sort them and save them as they are. You can write notes over virtually any application or web page, capture everything as a screenshot and save it as a PDF or PPT file. Or you can mark up files in common applications, like Microsoft® Word, Excel®, PowerPoint®, Visio® and OneNote®, as well as Adobe® Acrobat® Pro, and SMART Meeting Pro will insert and save your notes in the original document. And regardless of how you choose to save your work, you can distribute the files to your team instantly via e-mail, so everyone has the most recent notes when they get back to their computers.

### Get everyone on the same page – literally

SMART Meeting Pro makes it easier than ever to share information, analyze data, brainstorm, solve problems and document the results of your collaboration sessions. No matter what your business does, SMART Meeting Pro can provide a dynamic, engaging way to help keep your meetings and collaboration sessions on track.

- 1 Write, save and distribute notes – Write notes in digital ink, either on whiteboard pages or over documents and websites, then save them and distribute them via e-mail
- 2 Page sorter – View all your interactive whiteboarding pages and sort them easily
- 3 Interactive whiteboarding features – Switch from cursor to pen or eraser – and access shapes and lines with a single touch
- 4 Intuitive toolbar – Toggle between your desktop and your interactive whiteboard pages. Move the toolbar or collapse it. Use the reset room function to exit the session, close any open applications and clear the whiteboard, all in one step.

## Key features

### Write notes

Write notes in digital ink over documents, web pages and applications, then save your work in a variety of ways for distribution or later reference.

### Save function

Save your notes into a single whiteboard file. Or take screenshots of marked-up applications and web pages and save them as PPT or PDF files. Or write notes over Microsoft Office applications and save them directly into the original documents. Notes and files can be saved to your local hard drive, network or USB drive.

### Integration with common office software

Write in digital ink in Microsoft Word, Excel, PowerPoint, OneNote and Visio files, as well as AutoCAD® and Adobe Acrobat files. Save all marked-up documents in their original formats.

### Multitouch, multiuser support

SMART Meeting Pro supports the multitouch and multiuser features found in the SMART Board 800 series interactive whiteboards and displays.

### Intuitive toolbar

An easy-to-use toolbar appears automatically when you power up your SMART Board interactive whiteboard or display. Use it to toggle between your desktop and your whiteboard, capture screenshots, and undo or redo work. You can also use the toolbar to access shapes, lines and text, and to select pen colors, eraser widths and highlighters.

## Interactive whiteboarding features

Create interactive whiteboard pages and easily move from page to page. Manipulate objects with features such as move, resize and rotate, cut, copy and paste. You can also change object properties and reorder objects.

### Auto crash recovery

SMART Meeting Pro supports automatic crash recovery, so meeting notes can be recovered upon a system reboot.

### Page sorter

View all interactive whiteboard pages and sort them by dragging, inserting or deleting pages.

### Keyboard integration

SMART Meeting Pro software works with the On-Screen Keyboard or your system's wireless keyboard and mouse.

### Distribute notes

Distribute all notes and action items immediately via e-mail or save them to a USB storage device for transfer later.

### Reset room function

Exit the session, close any open applications and clear the whiteboard, all in one step. There's also an option to log off the meeting room computer.

## Technical requirements

### Hardware

#### For a single display – Meeting Pro and Meeting Pro Premium

2.0 GHz dual-core processor • 1GB RAM (XP) 2GB RAM (Windows 7) (4GB recommended) • Discrete 128 MB VRAM video card compliant with Microsoft DirectX® 9 • 1 GB free hard drive space (additional free space required during installation) • 10 Mbps network connection (100 Mbps recommended) supporting TCP/IP

#### For multiple displays – Meeting Pro and Meeting Pro Premium

3.0 GHz dual-core processor • 4GB RAM • Multidisplay discrete 256 MB VRAM video card compliant with Microsoft DirectX 9 • 1 GB free hard drive space (additional free space required during installation) • 10 Mbps network connection (100 Mbps recommended) supporting TCP/IP

### Software

Windows XP Service Pack 3, Windows 7
